Sat, 02 Mar 2019 00:22:00 GMT Inequalities in information theory - Wikipedia - Information entropy is the average rate at which information is produced by a stochastic source of data.. The measure of information entropy associated with each possible data value is the negative logarithm of the probability mass function for the value: $H = -\sum p_j \log p_j$. When the data source produces a low-probability value (i.e., when a low-probability event occurs), the event carries more ...
