Implementing biosecurity on a poultry operation can prevent the introduction and spread of infectious diseases, including Avian Influenza. Mon, 18 Mar 2019 02:33:00 GMT The Center for Food Security and Public Health - Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods. Sun,
