Mon, 18 Mar 2019 17:14:00 GMT interaction of shock waves fluid pdf - The abruptness of change in the features of the medium, that characterize shock waves, can be viewed as a phase transition: the pressure-time diagram of a supersonic object propagating shows how the transition induced by a shock wave is analogous to a dynamic phase transition.. When an object (or disturbance) moves faster than the information can propagate into the surrounding fluid, then the ... Thu, 21 Mar 2019 05:50:00 GMT ME 323: FLUID MECHANICS-II | Angkan Haider - Academia.edu - Hydrostatic shock is the controversial concept that a penetrating projectile (such as a bullet) can produce a pressure wave that causes "remote neural damage", "subtle damage in neural tissues" and/or "rapid incapacitating effects" in living targets. It has also been suggested that pressure wave effects can cause indirect bone fractures at a distance from the projectile path, although it was ...
