Sun, 17 Feb 2019 03:36:00 GMT mitochondria in pathogenesis pdf - Mitophagy is the selective degradation of mitochondria by autophagy. It often occurs to defective mitochondria following damage or stress. The process of mitophagy was first described over a hundred years ago by Lewis and Lewis. Ashford and Porter used electron microscopy to observe mitochondrial fragments in liver lysosomes by 1962, and a 1977 report suggested that "mitochondria develop ... However, the precise mechanisms by which aging promotes these mitochondrial alterations and the role of the latter in aging are still not fully understood.
