Fri, 15 Feb 2019 14:37:00 GMT Financial Modeling Training - Wall Street Prep - Overview. Data modeling is a process used to define and analyze data requirements needed to support the business processes within the scope of corresponding information systems in organizations. Therefore, the process of data modeling involves professional data modelers working closely with business stakeholders, as well as potential users of the information system.

Sat, 16 Feb 2019 08:24:00 GMT Data modeling - Wikipedia - Modeling and simulation (M&S) at simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon. As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the parameters of physical model and represent physical model in virtual form then ...

introduces new technology and protocols (intelligent systems) that teach the reader how to apply data analytics to solve real-world, reservoir engineering problems. The book describes how to utilize machine-learning-based algorithmic protocols to reduce large quantities of difficult-to-understand data down to actionable, tractable quantities.
