Sun, 17 Mar 2019 11:46:00 GMT molecular typing of blood cell pdf - A blood type (also called a blood group) is a classification of blood, based on the presence and absence of antibodies and inherited antigenic substances on the surface of red blood cells (RBCs). These antigens may be proteins, carbohydrates, glycoproteins, or glycolipids, depending on the blood group system. Some of these antigens are also present on the surface of other types of cells of ... The technique is used to diagnose and monitor disease, detect risk, and decide which therapies will work best for individual patients. Thu, 14 Mar 2019 13:08:00 GMT Molecular

diagnostics - Wikipedia - A stem cell transplant* may sometimes be medically necessary for patients with lymphomas. With a stem cell transplant, the stem cells** obtained from bone marrow, peripheral blood, or umbilical cord blood are given back to the patient following high dose treatment, which can damage or ablate (kill off) these vital cells.
