A system's behavior can be mathematically modeled and is represented in the time domain as $h(t)$ and in the frequency domain as $H(s)$, where s is a complex number in the form of $s=a+ib$, or $s=a+jb$ in electrical engineering terms (electrical engineers use "j" instead of "i" because current is represented by the variable i). However, unlike in the impulse signal, spectral components of the chirp signal have different phases, i.e., their power spectra are alike but the phase spectra are distinct. Dispersion of a signal propagation medium may result in unintentional conversion of impulse signals into chirps. Wed, 13 Feb 2019 20:16:00 GMT Chirp - Wikipedia - Lista de
